WORK EXPERIENCE

KonectIn

Nigeria, Lagos (Remote)

Backend Engineer

DEC 2023 - PRESENT

- Resolved backend errors in Resume builder platform, ensuring 100% issue resolution accuracy through rigorous testing with Supertest.
- Improved code architecture for better maintainability and scalability, integrating Mailtrap and AWS S3, and employing Swagger UI for API documentation.
- Eliminated bugs in the resume builder platform, boosting client trust and increasing website user engagement by 25% and system reliability by 30%.

CoCreation Hub

Rwanda, Kigali (Hybrid)

Backend Engineer

JUNE 2020 - FEB 2023

- Implemented a platform for interdisciplinary collaboration in epidemiological research, uniting 400+ professionals from diverse fields.
- Developed a digital health tool with therapy, self-help, and crisis intervention, leading to a mental health management improvement.
- Developed a platform for real-time social network analysis, leading to a 20% increase in interventions during the COVID-19 pandemic and saving lives.

Coding Black Females

United Kingdom, London(Remote)

React Course Instructor

OCT 2022 - DEC 2022

- Crafted a transformative learning journey for students, regardless of their location or background.
- Offered guidance to a global audience, bridging geographical gaps to create an inclusive learning environment.
- Empowered diverse students in tech, leading to a 30% increase in career placements.

Coding Black Females

United Kingdom, London(Remote)

Teaching Assistant

JUNE 2022 - OCT 2022

- Collaborated with the Introduction to the Web Development course instructor to create an engaging learning experience for students across 5 continents.
- Provided guidance and support to students, ensuring they had the resources they needed to succeed.
- Participated in discussions and offered valuable insights, contributing to the overall success of the course.

PROJECTS

Event Management Tool [Github](#)

- Employed TypeScript, Express, MySQL, Docker, Mocha, Chai, AWS S3, and GraphQL to develop an event management tool, streamlining planning and enhancing user experience.

Resume Builder Platform [Github](#)

- Utilized Node.js, MongoDB, AWS S3, Mailtrap, and Supertest to enhance a resume builder, improving system reliability, and integrating AWS S3 for file management.
